# Subject Index

Absorptiometry. *See* Photon absorptiometry
A - E complex. *See* Articular - Epiphyseal complex
Aging, effect on bone mineral content in normal women, 249
Alkaline phosphatase,
  serum level related to increase in serum testosterone, 127
  activity in osteogenic layer-cultured peristea, 262
  inhibition by levamisole and effect on bone formation, 296
  marker of bone formation in study of bone loss in postmenopausal women, 318
AMP, cyclic. *See* Cyclic AMP
Animal model, study of vitamin D-dependent rickets type I, 87
Apatite,
  modified by temperature changes in tooth enamel, 197
  role of surface area in adsorption of water, 333
Articular - epiphyseal complex, ultrastructure of osteochondrosis, 44
Ascorbic acid, effect on mineralized bone formation, 143

Beagles,
  study of trabecular bone remodeling after NaF administration, 217
  bone surface activity following progestogen supplementation, 239
Bisphosphonate,
  effect on bone resorption, 38
  cytotoxic and migration inhibitory effects on macrophages, 227
  effect on metaphyseal bone remodeling in the rat, 342
Bone,
  resorption in neonatal mouse calvaria, 38
  presence of silicon, 52
  stimulation of matrix formation in rat long, 79
  release of PTH or CT stimulated cAMP from, 163
  surface activity following progestogen supplementation in spayed beagles, 239
  distribution of vitamin D-dependent calcium-binding protein, 244
  correlation of deproteinization and adsorption of water, 333
  effect of casein phosphopeptides on calcification of rat bone, 350
Bone formation,
  stimulation by 1,25 dihydroxyvitamin $D_3$, 79
  *in vitro* from rat calvaria cell populations, 143
  impaired mineralization by high doses of 1,25 dihydroxyvitamin $D_3$, 234
  effect of alkaline phosphatase inhibited by levamisole, 296
  study of postmenopausal women and development and occurrence of osteoporosis, 318
Bone histomorphometry. *See* Histomorphometry
Bone loading, effect on bone loss, 209
Bone loss,
  effect of calcium insufficiency and disuse on, 209
  increases in bone mass may be negated by continued administration of NaF, 217
  effect of age on rate, 249
  increased chemical markers of in osteoporotic and postmenopausal women, 318
Bone marrow, role of vitamin D in, 33
Bone matrix, decreased hydroxyproline residues in paraplegia bone, 323
Bone matrix apposition, role of alkaline phosphatase activity, 296
Bone mineral content,
  after salmon calcitonin treatment, 3
  determination of osteoporosis risk, 9
  in relation to vitamin D metabolism during male puberty, 127
  age dependency, 249
Bone remodeling,
  during development of osteoporosis in paraplegia, 323
  effect of aminobisphosphonates in rats, 342
Bone resorption,
  effects of hydrocortisone, parathyroid hormones, and bisphosphonate on, 38
  inhibition by omeprazole, 123
  effects of prostaglandins and parathyroid hormones, 130
  role of bisphosphonates, 227
  role of serum concentrations of sex steroids and bone turnover in osteoporosis, 318
  inhibition by human calcitonin gene-related peptide, 339
  effect of bisphosphonates, 342
Bone proteins, measured in Paget diseased bone, 60
Bone turnover,
  Paget's disease of bone, 60
  accute diminution induced by salmon calcitonin, 71
Bovine dentin phosphophoryn, binding to type I collagen, 135

Calcification, role of casein phosphopeptides in embryonic rat bone, 350
Calcitonin,
  effects in postmenopausal osteoporosis, 3
  acute antiosteoclastic effect, 71
  secretion inhibition by calmodulin, 103
  inhibition of bone resorption in parathyroid stimulated cultures, 130
  effect on release of cAMP from isolated perfused bone, 163
  used to reverse impaired mineralization in rat long bones, 234
  effect on bone resorption compared with that of human calcitonin gene-related peptide, 339
Calcitonin gene-related peptide, inhibition of bone resorption, 339
Calcium,
  metabolism evaluation of study effect of calcitonin on osteoporosis, 3
  role in ornithine decarboxylase activity, 21
  effect of prostaglandins on release in rat long bones cultured with parathyroid hormone, 130
  enhanced uptake on collagen fibers by bound phosphophoryn, 135
  total body amount and treatment for deficiency, 187
  alteration of levels by fluorosis in pigs, 222
  inhibition of parathyroid adenylate cyclase, 275
  role of ouabain-dependent potassium transport in regulation of, 306
Calcium absorption,
  measurement in isolated duodenal segments in mice, 95
  role of 1,25 dihydroxyvitamin $D_3$ in patients with hyperparathyroidism, 193
  influence of glucocorticoids in rat intestine, 282
  use of strontium for assessment of, 303
Calcium deficit,
  determination and analysis of, 9
  role in postmenopausal osteoporosis, 187
  effect on bone loss, 209
  effect on rat dams, fetuses, and offspring, 289
Calcium hydroxyapatite crystals, role of phosphophoryn in growth of, 135
Calcium ions,
  replacement increases migration inhibitory effects of bisphosphonates, 227

concentration in presence of peptides in rat bone, 350
Calcium phosphates,
dissolution of crystals preceded by endocytosis, 170
measurement in laser-irradiated and heated tooth enamel, 197
Calmodulin,
cause of calcitonin secretion inhibition, 103
as inhibitor of calcium sensitivity of parathyroid adenylate cyclase, 275
Calvaria,
omeprazole inhibits calcium release, 123
role in mineralized bone nodule formation, 143
cAMP. *See* Cyclic AMP
Carbonate ions, properties of synthetic hydroxyapatite containing, 293
Cartilage,
ultrastructure of osteochondrosis, 44
differentiation of chondroprogenitor cells into, 155
chondrocytes localize vitamin D-dependent calcium-binding protein, 244
Casein, effect on calcification of *in vitro* cultured embryonic rat bone, 350
Cell culture, secretion of parathyroid hormone by, 27
Chloropromazine, effect on calcitonin release, 103
Chondrocytes, localization of vitamin D-dependent calcium-binding protein, 244
Chondroprogenitor cells, proliferation stimulated by parathyroid hormone, 155
Collagen, binding to bovine dentin phosphophoryn, 135
Corticoendosteum, effect of progestogen treatment on mineralization lag time on, 239
Creatine, with calcium and hydroxyproline as marker for bone formation and resorption, 318
Cyclic AMP,
role in ornithine decarboxylase activity, 21
effect of glucocorticoid on release from isolated perfused bone, 163
Cytochalasin B, effect on dissolution of basic calcium phosphate crystals, 170
Cytotoxicity, of bisphosphonates and effect on macrophages, 227

Dexamethasone,
role in bone nodule formation, 143
ability of administration to modulate cAMP response to PTH or CT, 163
1,25 Dihydroxycholecalciferol,
effect on parathyroid hormone secretion, 27
effect on 1-hydroxylase activity, 87
1,25 Dihydroxyvitamin $D_3$
effect on undermineralized matrix formation, 79
topical administration for psoriasis, 119
effect on intestinal calcium absorption in hyperparathyroid patients, 193
high doses induce impaired mineralization, 234
stimulation of bone mineralization, 296
effect on osteocalcin in postmenopausal osteoporosis, 328
effect of tumor-induced hypophosphatemic osteomalacia on levels of, 358
Disuse, effect on bone loss, 209
Diurnal variation, effect of menopause on serum calcium and phosphorus, 115
Dual-photon absorptiometry. *See* Photon absorptiometry
Duodenum,
absorption of calcium in isolated segments *in vitro*, 95
influence of glucocorticoids on calcium transport in, 282

Editorial,
keeping up with the times, 1
Paget's disease of bone, 309
Electric dipole reorientability, in human tooth enamel, 252
Enamel, correlation of deproteinization and adsorption of water, 333
Endocytosis, role in dissolution of basic calcium phosphate crystals by murine macrophages, 170
Epidermal growth factor (EGF),
involvement of glycosyl moieties in binding to receptor, 109
molecular characterization of receptor, 109

Fetal bone cultures, effects of prostaglandins on bone resorption in, 127
Fluoride,
administration activates trabecular bone remodeling activity, 217
role in calcium homeostasis in high calcium and vitamin D diet, 222
Fluorosis, effects of parathyroid glands, calcium, and vitamin D, 222

Gamma carboxyglutamic acid, marker of bone turnover, 60
Glucocorticoids,
induction of osteoporosis and prevention, 38
effect on PTH or CT stimulated cAMP release from bone, 163
effect on calcium absorption in rat intestine, 282
Growth rate,
related to serum vitamin D metabolism, 127
offspring of calcium-deficient rat dams, 289

Haloperidol, effect on calcitonin release, 103
$H^+$ - $K^+$-ATPase, inhibition by omeprazole, 123
Histomorphometry,
effects of ovariectomy, 62
inter-observer and intra-observer variations, 67
effect of fluoride on, 217
study of surface activity on peristeal and corticoendosteal bone envelopes, 239
$^3$H-thymidine, incorporation in PTH-treated explants is dependent on calcium concentration, 155
Human tooth enamel,
effect of heat and laser irradiation, 197
reorientable electric dipoles, 252
Hydrocortisone, effect on bone resorption, 38
Hydroxyapatite,
reorientability of electric dipoles, 252
uptake of lithium ions in synthetic carbonated, 293
study of adsorption of water on apatitic calcium phosphates, 333
Hydroxyproline,
effect on excretion by salmon calcitonin, 71
increase in content due to 1,25 dihydroxyvitamin D3, 79
/creatine as a marker for bone resorption, 318
decreased residues of in paraplegia bone, 323
Hypophosphatemia, calcium absorption in isolated duodenal segments, 95

Iliac crest, histomorphometric indices, 67
Ileum, influence of glucocorticoids on calcium transport in, 282
Immunolabeling, staining for collagen in bone nodules, 143
Immunocytochemistry, localization of vitamin D-dependent calcium-binding protein, 244
*In situ*,
role of ornithine decarboxylase activity in chicken osteoblasts, 21
study of growing long bones from chicks and rats by imaging ion microscopy, 52
Inter-observer variation, bone histomorphometry, 67
Intestinal calcium absorption. *See* Calcium absorption

Intra-observer variation, bone histomorphometry, 67
*In vitro*, differentiation of osteoid-producing cells, 262
Ion microscopy, elemental detection and localization, 52
Ionized calcium, diurnal variation in postmenopausal women, 115
Iron ions, synthesis of carbonated hydroxyapatite, 293

Lactation, analysis of calcium-deficient diet effect on rat offspring, 289
Laser-irradiated enamel, changes in solubility, 197
Levamisole, stereospecific inhibitor of alkaline phosphatase, 296
Lipid accumulation, in relation to epiphyseal cartilage lesion, 44
Lithium ions, decreases solubility of carbonated hydroxyapatite, 293
Lumbar spine, bone mineral content in normal women, 249

*Macaca fascicularis*, effects of ovariectomy, 62
Macrophages,
  modulation of mononuclear phagocyte lineage differentiation, 33
  solubilization of basic calcium phosphate crystals, 170
  study of cytotoxic and migration inhibitory effects of bisphosphonates, 227
Malabsorption, calcium in hypophosphatemic mice, 95
Male puberty, study of serum vitamin D metabolism, 127
Melorheostosis, follow-up of case of mixed-sclerosing-bone-dystrophy, 175
Menopause, effect on bone loss, 249
Mice, role of hypophosphatemia in calcium absorption, 95
Microenvironment, need for osteodifferentiation in culture systems, 262
Migration inhibition, effect of bisphosphonates on macrophages, 227
Mineralization,
  effects on matrix formation, 79
  of bone in presence of ascorbic acid and phosphate, 143
  impairment induced by high doses of 1,25 dihydroxyvitamin $D^3$, 234
  prevention by alkaline phosphatase inhibited by levamisole, 296
  bone remodeling during development of osteoporosis in paraplegia bone, 323
  effect of casein phosphopeptides in rat bone, 350
Mononuclear phagocyte, impaired differentiation corrected by normal bone marrow medium, 33

Neutron activation, analysis of osteoporosis risk, 9

Omeprazole, as inhibitor of bone resorption and $H^+$ - $K^+$-ATPase, 123
Oophorectomy, treatment with continuous progestogen supplementation, 239
Organ culture, effects of parathyroid hormone on morphology of, 155
Ornithine decarboxylase, activity in chicken osteoblast cultures, 21
Osteitis pubis, in athlete, 76
Osteoblasts,
  ornithine decarboxylase activity in, 21
  growth on bone nodules, 143
  tentative identification of cells as, 268
  effect of stimulation of on osteocalcin levels observed under 1,25 dihydroxyvitamin $D_3$ treatment, 328
Osteocalcin, effect of 1,25 dihydroxyvitamin $D_3$ treatment on basal levels in postmenopausal osteoporosis, 328
Osteochondritis dissecans, causes in humans, 44
Osteochondrosis, ultrastructure of the articular–epiphyseal cartilage complex, 44
Osteoclasts,
  effect of vitamin D deficiency, 33
  role in bone resorption, 123
  production in mixed bone cell culture, 268
Osteogenesis, role in differentiation of osteoid-producing cells, 262
Osteogenesis imperfecta, mineralized tissue protein profiles in, 16
Osteomalacia, effect of tumors and hypercalcemia on serum phosphorus levels, 358
Osteonectin,
  levels in affected osteogenesis imperfecta bone, 16
  growth on bone nodules, 143
Osteopathia striata, follow-up of case of mixed-sclerosing-bone-dystrophy, 175
Osteopetrosis, follow-up of case of mixed-sclerosing-bone-dystrophy, 175
Osteopoikilosis, follow-up of case of mixed-sclerosing-bone-dystrophy, 175
Osteoporosis,
  postmenopausal, effects of salmon calcitonin, 3
  determination of risk, 9
  prevention, 38
  effect of salmon calcitonin, 71
  vertebral trabecular bone of cynomolgus monkey, 62
  role of skeletal calcium deficiency after menopause, 187
  modulation of during calcium insufficiency by dynamic loading, 209
  effect of age in normal women, 249
  role of serum concentrations of sex steroids and bone turnover, 318
  bone remodeling during development in paraplegia, 323
  effect of 1,25 dihydroxyvitamin $D_3$ on basal levels of osteocalcin, 328
Osteosarcoma cells, as receptor of epidermal growth factor, 109
Osteosclerosis, follow-up of case of mixed-sclerosing-bone-dystrophy, 175
Ouabain, inhibitory effect used to test for Na/K-ATPase transport mechanism, 306
Ovariectomy, effects on vertebral trabecular bone, 62

Paget's disease,
  of bone, 60, 309
  effect of salmon calcitonin, 71
Paraplegia, bone remodeling during development of osteoporosis in, 323
Parathyroid adenylate cyclase, inhibition by high affinity calium, 275
Parathyroid cells, suppression of PTH secretion by monolayer cultures, 27
Parathyroid gland, alteration by fluorosis in pigs, 222
Parathyroid hormone,
  role in chicken osteoblast cultures, 21
  secretion by bovine cell cultures, 27
  effect on bone resorption, 38, 130
  effect of extracellular calcium on release, 103
  stimulation of proliferation of chondroprogenitor cells, 155
  effect on release of cAMP from isolated perfused bone, 163
  alteration of levels by fluorosis in pigs, 222
  used to reverse impaired mineralization in rat long bones, 234
  role of tumor-induced hyopohosphatemic osteomalacia, 358
Periosteum, effect of progestogen treatment on mineralization lag time on, 239
Phagocytosis, dissolution of BCP crystals by murine macrophages, 170
Phosphopeptides, effect on calcification of *in vitro* cultured embryonic rat bone, 350
Phosphophoryn, levels in affected osteogenesis imperfecta, 16
Phosphorus,
  metabolism evaluation to study effect of calcitonin on osteoporosis, 3
  diurnal variation in postmenopausal women, 115
  serum levels effected by tumor-induced hypophosphatemic osteomalacia, 358
Phosvitin, reduction of phosphophoryn binding, 135

Photon absorptiometry,
evaluation of calcium and phosphorus metabolism, 3
analysis of osteoporosis risk, 9
determination of bone mineral content in lumbar spine, 249
Pigs,
osteochondrosis of articular-epiphyseal cartilage complex, 44
study of vitamin D-dependent rickets, 87
fluorosis, 222
Postmenopausal osteoporosis. *See* Osteoporosis
Postmenopause,
diurnal variation of serum calcium and phosphorus, 115
study of bone loss, 318
Potassium, role of ouabain-dependent in calcium regulation, 306
Primary hyperparathyroidism, intestinal calcium absorption in patients with, 193
Progestogen, effect on surface activity of periosteal and corticoendosteal envelopes, 239
Proliferation, of chondroprogenitor cells stimulated by parathyroid hormone, 155
Prostaglandins, effect on bone resorption, 130
Proteins,
noncollagenous, role in osteogenesis imperfecta, 16
cellular distribution of vitamin D-dependent calcium binding, 244
Proteoglycan, role in osteogenesis imperfecta, 16
Psoriasis, treated with 1,25-dihydroxyvitamin $D_3$, 119
Pyrophosphate, formation in tooth enamel apatite induced by temperature change, 197

Quantitation, variations of histomorphometric indices, 67

Radioimmunoassay, assessment of 1,25 DHCC and 24,25 DHCC concentration, 222
Rat tibial metaphysis, effect of aminophosphonates on bone remodeling, 342
Receiver operating characteristic analysis, risk of developing osteoporosis, 9
Receptor glycosylation, role in epidermal growth factor binding to receptor, 109
Remodeling,
effect of dynamic loading in bone loss, 209
effect of NaF administration on trabecular bone activity, 217
Renal-1-hydroxylase, activity in pig strain with rickets, 87
Rickets, age dependency in hypophosphatemic mice, 95
Rickets type I, vitamin D-dependent, 87

Serum estrogens, role of serum concentrations of in postmenopausal osteoporosis, 318
Silicon, in vertebrate bone tissue, 52
Sodium - potassium exchange, mediation of potassium accumulation in bone, 306
Solubility, reduction in tooth enamel by laser irradiation, 197
Stem cell, role of vitamin D in, 33
Strontium, used to assess intestinal calcium absorption, 303
Surface area, role in adsorption of water in synthetic apatites, 333

Thermally modified apatite. *See* Apatite
Thermally stimulates currents, study of electric dipole reorientation, 252
Trabecular bone remodeling. *See* Remodeling
Trabecular bone,
inter-observer differences in volume measurement, 67
measurement of calcium and hydroxyproline content, 79
Trifluoperazine, effect on calcitonin release, 103
Tumor-induced hypophosphatemic osteomalacia, effect on serum phosphorus levels, 358

Veterinary, study of osteogenesis imperfecta, 16
Vitamin D,
metabolism during male puberty, 127
alteration of levels in pigs by fluorosis, 222
Vitamin D deficiency,
use in mononuclear phagocyte cells, 33
Vitamin D-dependent calcium binding proteins. *See* Proteins
Vitamin D-dependent rickets type I, activity of renal 25-hydroxy-cholecalciferol-1-hydroxylase, 87

W-7, effect on calcitonin release, 103
Water vapor, adsorption on apatites, 333

Young men,
diurnal variation of calcium and phosphorus compared with postmenopausal women, 115
vitamin D metabolism during puberty, 127
